(*b*) that, in his opinion, if the site be built upon as proposed, the stability or security of any hillside or bank or any immovable property thereon would not be threatened by the building or could be made secure by the addition of protective works.

(*2*) If the said Engineer certifies that the site is not secure as aforesaid, or that the stability or security of any hillside, bank or property would be threatened by the proposed building, or that the addition of protective works is necessary,

and if the Commissioners consider that the site ought nevertheless to be approved and permission to execute the work to be granted or that the said protective works need not be added,

the Commissioners shall refer the matter to the Engineer appointed under section 494 and shall deal with the application in accordance with his decision.

(*3*) If protective works have to be *added* as aforesaid to any site, permission to execute the work shall not be granted until the necessary protective works have been constructed and have received the written approval of the Commissioners.

8. (*1*) Except in special sites where, in the opinion of the Commissioners, the conditions are such that the provisions of this rule may be relaxed, the height of a building shall be regulated by the width of the surrounding open space in the same holding *plus* the width of the road or roads, if any, in the following manner, namely:—

(*i*) if such width in any direction be *twenty* feet or *less* the height of the building shall not exceed fourteen feet in that direction;

No. 6-I.—19th February 1939.—It is hereby notified for general information that in exercise of the powers conferred by sections 6 and 11 of the Canals Act, 1864 (Bengal Act V of 1864), and in supersession of notification No. 17-I., dated the 16th September 1930, the Governor intends to make the following rules and fix the following rates of tolls for the line of navigation known as the Roypasa-Nathullabad-Jail Khal in the district of Bakarganj and as defined in notifications No. 9-I., dated 22nd July 1930, and No. 3-I., dated the 19th February 1939.

2. Any objection or suggestion with respect to the said rules and rates of tolls should reach the undersigned before the 7th April 1939.

**Rules and Rates of Tolls.**

1. Every vessel on entering the channel and before passing the gate at either end or even when entering the channel from a side khal between the gates shall be liable to measurement for the purpose of ascertaining the tolls payable; in case of any reasonable doubt arising, a vessel may be measured again by any person appointed by the District Board of Bakarganj on this behalf.

2. Vessels for the purpose of the determination of maundage shall be divided into two classes as below:—

*Class I*—To include all vessels of the types of country boats, including saltees and hapors (fish cages), house boats, Kosh boats, green boats and other similar types of boats.

*Class II*—To include steam boats, motor boats, flats and barges and other square built vessels.

3. The maundage of every vessel, whether laden or empty shall, for the purpose of the Canals Act, 1864, and of these rules, be determined by the following measurements:—

*Class I.*

A. The product of one quarter of the length of the vessel from stem to stern, measured along the water-line, multiplied by the interior greatest breadth of the vessel, multiplied by the depth from the water-line to the interior bottom of the vessel, is to be taken as equal to the number of maunds upon which tolls shall be levied.

B. The measurement of the length is to be made in feet, rejecting inches; the measurement of breadth and depth is to be made in feet and quarters of a foot, rejecting any remainder of less than a quarter of a foot.

C. The maundage on which the amount of toll is calculated shall be reckoned to the nearest integral multiple of 12½ maunds, any remainder of less than 12½ maunds being rejected. In the case of vessels exceeding 500 maunds by measurement, the maundage shall be reckoned to the nearest integral multiple of 50 maunds, rejecting any remainder of less than 50 maunds.

D. *Saltees.*—The product of one quarter of the inside length of the vessel, measured along the centre line from stem to stern, multiplied by the interior greatest breadth of the vessel, multiplied by the greatest depth measured from the top to the interior bottom of the vessel, is to be taken as equal to the number of maunds upon which tolls shall be levied.

*Class II.*

For vessels of class II the number of maunds obtained by the system of measurement prescribed for vessels of class I shall be increased by one-half. For vessels of this class above 5,000 maunds measurement, the maundage shall be reckoned to the nearest integral multiple of 500 maunds, rejecting any remainder of less than 500 maunds. In the case of steamers and motor boats the maundage determined as above shall be reduced by one-third as an allowance of engine space.

For vessels of class II which are furnished with reliable way bills, the gross maundage of cargo shown by the way bills or in the case of steamers, the maundage obtained from multiplying the registered tonnage of the steamer by 27, may, at the option of the employer of the vessel or the steamer (as the case may be) be taken as the maundage on which tolls will be charged.

4. After the measurement the person in charge of the vessel shall be provided with a slip showing the maundage to be charged, which shall be presented at the toll office where he will be provided with a ticket, after payment of toll, which will permit the vessel to pass the gate or proceed through the channel.

5. Every ticket shall have entered on it the name of the serang, manjee or other person in charge of the vessel, the date of entry, the maundage, the cargo, the amount of toll charged and the number of days for which the ticket remains current.

6. All tolls are payable on demand and shall be paid at the toll office before a vessel is permitted to proceed.

7. The ticket shall be kept on board the vessel and in possession of the person in charge of the vessel and shall be produced for inspection when demanded by the person authorised to collect tolls, or by any officer to whom such person is subordinate. If on demand the ticket is not produced, such person or officer shall assess the tollage as provided in rules 3 and 12 and shall require payment of toll, and unless and until the toll is paid, or the original ticket or a duplicate is produced as evidence that toll has already been paid, the vessel shall be liable to seizure and detention under the provisions of section 9 of the Act.

8. Duplicates of lost tickets, of which the numbers and dates can be satisfactorily established, will be granted by the collector of tolls on payment of a fee equal to one-quarter of the total tollage, subject to a minimum fee of one anna per ticket.

9. All vessels, whether the property of Crown, of District Board, or other local bodies or of private persons, are liable for toll except those specially exempted under these rules or by a resolution passed by the district board of Bakarganj from time to time.

10. The canal may be closed once a year for effecting the necessary repairs to it on seven days' notice of the intention so to close it being given; but in the event of any sudden emergency the canal may be closed at any time without prior notice, and no claim in such case by owners of vessels or others for compensation on account of detention shall be entertained.

11. No rafts exceeding 50 feet in length and 5 feet in breadth shall be permitted to enter the canals.

12. The rate of toll shall be as follows:—

(*1*) On all vessels empty or laden per hundred maunds—Twelve annas.

(*2*) On all vessels empty or laden, for 12½ maunds or less—One anna six pies.

(*3*) On rafts of bamboos, grass, timber or other similar articles, not exceeding 50 feet in length and 5 feet in breadth—Six annas each raft.

Tolls shall be levied at Barisal or at Amanotganj near Barisal Chowk Bazar, at Kawnia near old cremation ground (at the west end of Jail khal), at Defulia near Baniakati bridge and at North Karapur (Bagadhi) at the west end.

13. For boats frequently using the canal, such as boats carrying passengers, grass or perishable articles monthly tickets will be issued at 10 times the ordinary toll.

14. Every vessel which has paid toll shall be allowed to remain in the canal for three days inclusive of the days of entry into and leaving the canal. A vessel remaining in any part of the canal longer than three days shall be charged demurrage equal to one half of the toll for each day in excess of three days. No vessel shall be permitted to remain in the canal for more than one month, i.e., provided that this rule shall not apply to vessels holding monthly tickets under rule 13, which may remain in the canal for more than three days without payment of demurrage but not for more than one month at a time.

15. No vessel carrying exclusively police officers or servants, soldiers and officers of the British Army, post mail runners, officers of the Irrigation Department on duty, officers and servants of the toll office for the canal referred to in these rules while on duty, shall be liable for toll in the canal.

16. Any matter relating to the mode of collection of tolls and other relevant points, not provided for in these rules, shall be decided by the district board of Bakarganj at a meeting and such decision shall be subject to the approval of the Provincial Government.

By order of the Governor,

### NOTIFICATIONS.

ESTABLISHMENTS.

New Delhi, the 22nd February 1939.

No. 35/10/39.—In pursuance of clause 4 of the Regulations for admission to the Indian Civil Service by examination in the United Kingdom, and in supersession of the notification of the Government of India in the Home Department, No. F.-266/30-Ests., dated the 21st February 1931, the Governor-General in Council is pleased to prescribe the following instructions for the issue of certificates of nationality and age to candidates for the said examination who are of Indian domicile or descent, and who are not in possession of certificates of birth or of baptismal certificates stating the date of birth, namely:—

**Instructions for the issue of certificates of nationality and age to candidates for the Indian Civil Service examination in London who are of Indian domicile or descent.**

*General.*

I. A candidate for the Indian Civil Service examination in London who is of Indian domicile or descent and who is not in possession of a certificate of birth or of a baptismal certificate stating the date of birth, should before leaving India obtain a certificate of nationality and age signed, if he is resident in British India, by the Secretary to Government of the Province, or the Commissioner of the Division within which his family resides; or if he is resident in a State in India, by the highest Political Officer accredited to the State in which his family resides. If the candidate has proceeded to England without obtaining the certificate, the certificate may be granted to his father or guardian, provided that the latter produces the requisite evidence, and when making the application states when the candidate went to England, and where he has been residing during his stay in that country.

II. In order to obtain a certificate a candidate is required, if resident in British India, to prove the date and place of his birth and his nationality before the Magistrate of the District in which his family resides, or, if resident in a State in India, before the Political Officer of the State in which his family resides.

III. A candidate who wishes to obtain a certificate must, if resident in British India, signify to the Secretary to Government of the Province, or the Commissioner of the Division in which his family resides, his desire to compete, not less than three months before the date on which he proposes to go to England. If resident within a State in India, he must signify his desire in like manner to the highest Political Officer accredited to the State within which his family resides. The Officer to whom the application is made shall forward it for the purpose of inquiry to the Magistrate of the District or Political Officer of the State in which the applicant's family resides.

IV. The Magistrate or Political Officer to whom such application has been forwarded shall call upon the candidate to appear and give evidence of the date and place of his birth and of his nationality within one month. He will carefully examine the value of the evidence given, and forward a summary of it, with certified copies of all documents tendered, and his comments and opinion to the Officer who forwarded the application to him for inquiry.

V. The documentary evidence which a candidate may be expected to produce comprises:—

(*a*) The horoscope.

(*b*) Family books.

(*c*) Tradesmen's account books showing entries relating to the birth.

(*d*) The Matriculation Certificate. If the Matriculation Certificate does not contain sufficient particulars to show that the candidate is qualified by age to enter for the examination, a certificate from the candidate's University or College showing his date of birth as recorded on entering the University or College must also be furnished.

The age of a candidate as recorded on entering his University is regarded as correct unless there is proof to the contrary. If a candidate claims that his age is other than as so recorded he must submit *with this application* the evidence on which he bases his claim. In such a case the Magistrate or Political Officer will require, among other evidence, a satisfactory explanation of the circumstances in which a wrong age was recorded at the time of entry into the University. He will also require a statement of any attempts made by the candidate to have the University record amended and of the result of such attempts.

Oral testimony of persons acquainted with the candidate's family or otherwise able to give relevant evidence will also be taken; and the candidate is required to comply, to the best of his power, with any requisition the Magistrate or Political Officer, as the case may be, may make in order to clear up any doubt as to the purport of the documentary proof.

VI. Any declaration of age made after the 21st February 1931, on the occasion of seeking admission to any university examination, educational institution, or Government office, or otherwise recorded in a formal and deliberate manner, will be taken as conclusive evidence in disproof of the subsequent assertion by the same person that he is of different age to that so declared or recorded.

VII. Where the date and place of birth have been formally registered in a register kept by any public officer in British India, an extract from the register duly certified by the proper official shall be accepted as sufficient proof of the date and place of the birth.

*In the case of a candidate who is a British subject and whose father is alive.*

VIII. If the Secretary to Government, Commissioner of the Division, or highest Political Officer accredited to the State, as the case may be, is satisfied by the papers submitted, he will issue a certificate in the following form setting out the nature of the evidence produced by the candidate:—

'I hereby certify that....., who is a candidate for the Indian Civil Service examination in London, has submitted the proofs of his birth detailed below* and has satisfactorily shown that he was actually born on or about the date stated, *viz.*, the..... day of..... 19 . and further I hereby certify that he is a British subject and that his father is a British subject†.

a subject of . . . . . State in India†.'

*(Here enter details.)

*In the case of a candidate who is a British subject and whose father is dead.*

IX. If the Secretary to Government, Commissioner of the Division, or highest Political Officer accredited to the State, as the case may be, is satisfied by the papers submitted, he will issue a certificate in the following form, setting, out the nature of the evidence produced by the candidate:—

## DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 27th February 1939.

### Second Forecast of the Spring Oilseed Crops of Bengal, 1938-39.

(*Note.*—On an average of the five years ending 1936-37 the area under linseed in Bengal has represented some 3·4 per cent. and that of rape and mustard 11·9 per cent. of the total area under these crops in India.)

*Character of the season.*—As stated in the first forecast issued in December last the weather conditions were generally helpful during the early stage of the growth of the crops. Subsequently drought set in and adversely affected the development of the crops. Some damage also was caused at places by insect-pests. Present condition of the crops is fair on the whole.

*Area sown.*—Oilseeds are chiefly grown in the Dacca, Rajshahi and Presidency Divisions. In the other two Divisions the cultivation is not extensive. The total area under these crops (excepting *sesamum* for which separate forecasts are issued) is returned at 987,600 acres this year as against 950,500 and 951,100 acres, respectively, in the corresponding and final forecasts of last year.

*Outturn.*—From the District Officers' estimates the average outturn of the different oilseed crops for the Province works out at 77 per cent. of the normal as against 79 and 80 per cent. reported, respectively, in the corresponding and final forecasts of last year.

M. CARBERY,

*Director of Agriculture, Bengal.*

No. F.B. 2095, dated Calcutta, the 7th September 1938.

From—A. Frederick, Esq., M.I.Fire E., Chief Officer, Fire Brigade, Calcutta,

To—The Secretary to the Government of Bengal, Department of Public Health and Local Self-Government (Municipal).

(*Through L. H. Colson, Esq.*, C.I.E., I.P., J.P., *Commissioner of Police, Calcutta.*)

I have the honour to submit the following report on the working of the Calcutta Fire Brigade for the year ended 31st March 1938.

The work of the department throughout the year has been normal.

**Financial Statement.**—The Statement of Receipts and Expenditure and payments made by the municipalities within the jurisdiction of the Fire Brigade and Licensed Warehouse Act I of 1893 is given in Appendix I.

The cost of maintenance of the Fire Brigade is contributed by (*a*) the Calcutta Municipality, (*b*) the Howrah Municipality and (*c*) the Garden Reach Municipality at the rate of 83·5 per cent., 14 per cent. and 2·5 per cent., respectively.

Fees for licensed warehouses are charged under section 10 of the Licensed Warehouse and Fire Brigade Act, I of 1893, and are levied at 10 per cent. of the annual valuation of warehouses, subject to a maximum of Rs. 1,500 per warehouse per annum, and the income thus derived provides the 50 per cent. of the cost of the upkeep of the Fire Brigade under the Act.

**Fires, etc.**—The total number of calls to fires or supposed fires was 566 being an increase of 19 as compared with the previous year. The actual number of fires attended was 455 which shows a decrease of 4 as compared with the previous year, and the number of fires classed as serious (*i.e.*, over Rs. 20,000 damage per fire, see Appendix III) was 22 as compared with 17 during the previous year.

The following statement shows the hours when the calls were received:—

It is estimated that the motor fire appliances travelled 16,731 miles during the year to and from calls as compared with 11,124 miles in the previous year.

The following statement gives the number of times each motor fire engine has been turned out in response to calls:—

The total number of pumping hours at fires during the year was 1,210 hours 50 minutes as compared with 2,280 hours 30 minutes in the previous year.

*Fire stations.*—Appendix IV gives the number of times each fire station has been turned out in response to fire calls, together with monthly statements.

*Staff.*—The strength of the Brigade during the year was 274 as detailed below:—

One Chief Officer, 1 Second Officer, 1 Chief Engineer, 5 Station Officers, 8 Engineers, 7 firemen, 1 Warehouse Inspector, 5 clerks, 1 store-keeper, 3 telephone operators, 2 carpenters, 2 lathe mechanics, 1 fitter, 1 blacksmith, 1 tinsmith, 10 Indian drivers, 1 head tindal, 30 tindals, 178 khallasis and 15 menial employees.

During the year one Indian was appointed in the rank of the European Firemen and the word "European" has now been deleted.

The conduct and discipline of the staff throughout the year have been exemplary.

*Fatalities and accidents.*—Appendix VI gives short reports of fires and special occurrences involving loss of life or serious accidents.

The number of lives lost during the year under review is 13 being the same as per previous year.

Nine persons were injured at fires as compared with 7 in the previous year.

I am glad to report that no serious accidents occurred during training recruits, or at drill.

In all cases, where necessary, first-aid was rendered by the Fire Brigade and the injured persons conveyed to hospital by motor ambulances.

*Water supply.*—In Calcutta water for fire extinguishing is obtained from the unfiltered water-supply system maintained by the Corporation of Calcutta with pumping stations located on the banks of the river Hooghly at Mullick Ghat and Watgunge.

Fires in Cossipore-Chitpore and adjoining areas are dealt with water supplied from ponds or tanks, many of which are replenished only by rainfall. I beg to repeat my previous remarks regarding the condition of water-supply in this area as serious.

In Howrah the condition cannot be described as satisfactory, although the municipality has installed some hydrants on the filtered water supply for being used at fires.

*Fire float.*—The fire float (5,000 gallons per minute capacity) is stationed on the river opposite the Prinsep's Ghat. During the year under review it has responded to 14 calls as compared with 15 calls in the previous year.

*Street fire alarms, telephones and electrical communications.*—I am pleased to record my appreciation of the excellent service rendered by the Bengal Telephone Company.

*Inspection Department.*—The majority of theatres, cinemas and other places of public amusement, with few exceptions, have no serious fire risks and there were no serious fires during the year under review in theatres, cinemas or places of public amusement.

In connection with the Licensed Warehouse and Fire Brigade Act I of 1893, 6,271 inspections of warehouses have been made during the year. Four hundred and thirty-seven applications and complaints have been attended to and disposed of. One hundred and fifty-nine prosecutions were made under section 14 of Act I of 1893 which resulted in 91 persons being fined, the fines aggregating in all Rs. 1,605-8. Thirty-eight persons were warned and discharged and 30 cases were withdrawn.

*General.*—The Calcutta Fire Brigade protects the city of Calcutta and the municipalities of Howrah and Garden Reach, and may attend fires outside the boundaries of the above, but not exceeding a radius of 6 miles from Fire Brigade Headquarters, provided appliances can be spared, and on payment of a prescribed fee. The total area protected is approximately 112 square miles, comprising a population of over 2,000,000 persons.

Fire Brigade Headquarters is still located in premises rented for that purpose. A scheme for building an up-to-date and efficient headquarters on Free School Street as approved by the Calcutta Corporation, Garden Reach and Howrah Municipalities has now been sanctioned by Government and steps are being taken for building the station.

3. At places where mooring posts have been provided by the Supervisor, vessels desiring to moor shall be made fast in a single line along the banks to such posts in such manner as the Supervisor may direct and shall not be moored in any other manner.

No. 6-I.—19th February 1939.—It is hereby notified for general information that in exercise of the powers conferred by sections 6 and 11 of the Canals Act, 1864 (Bengal Act V of 1864), and in supersession of notification No. 17-I., dated the 16th September 1930, the Governor intends to make the following rules and fix the following rates of tolls for the line of navigation known as the Roypasa-Nathullabad-Jail Khal in the district of Bakarganj and as defined in notifications No. 9-I., dated 22nd July 1930, and No. 3-I., dated the 19th February 1939.

2. Any objection or suggestion with respect to the said rules and rates of tolls should reach the undersigned before the 7th April 1939.

**Rules and Rates of Tolls.**

1. Every vessel on entering the channel and before passing the gate at either end or even when entering the channel from a side khal between the gates shall be liable to measurement for the purpose of ascertaining the tolls payable; in case of any reasonable doubt arising, a vessel may be measured again by any person appointed by the District Board of Bakarganj on this behalf.

2. Vessels for the purpose of the determination of maundage shall be divided into two classes as below:—

*Class I*—To include all vessels of the types of country boats, including saltees and hapors (fish cages), house boats, Kosh boats, green boats and other similar types of boats.

*Class II*—To include steam boats, motor boats, flats and barges and other square built vessels.

3. The maundage of every vessel, whether laden or empty shall, for the purpose of the Canals Act, 1864, and of these rules, be determined by the following measurements:—

*Class I.*

A. The product of one quarter of the length of the vessel from stem to stern, measured along the water-line, multiplied by the interior greatest breadth of the vessel, multiplied by the depth from the water-line to the interior bottom of the vessel, is to be taken as equal to the number of maunds upon which tolls shall be levied.

B The measurement of the length is to be made in feet, rejecting inches; the measurement of breadth and depth is to be made in feet and quarters of a foot, rejecting any remainder of less than a quarter of a foot.

C. The maundage on which the amount of toll is calculated shall be reckoned to the nearest integral multiple of 12½ maunds, any remainder of less than 12½ maunds being rejected. In the case of vessels exceeding 500 maunds by measurement, the maundage shall be reckoned to the nearest integral multiple of 50 maunds, rejecting any remainder of less than 50 maunds.

D. *Saltees.*—The product of one quarter of the inside length of the vessel, measured along the centre line from stem to stern, multiplied by the interior greatest breadth of the vessel, multiplied by the greatest depth measured from the top to the interior bottom of the vessel, is to be taken as equal to the number of maunds upon which tolls shall be levied.

*Class II.*

For vessels of class II the number of maunds obtained by the system of measurement prescribed for vessels of class I shall be increased by one-half. For vessels of this class above 5,000 maunds measurement, the maundage shall be reckoned to the nearest integral multiple of 500 maunds, rejecting any remainder of less than 500 maunds. In the case of steamers and motor boats the maundage determined as above shall be reduced by one-third as an allowance of engine space.

For vessels of class II which are furnished with reliable way bills, the gross maundage of cargo shown by the way bills or in the case of steamers, the maundage obtained from multiplying the registered tonnage of the steamer by 27, may, at the option of the employer of the vessel or the steamer (as the case may be) be taken as the maundage on which tolls will be charged.

4. After the measurement the person in charge of the vessel shall be provided with a slip showing the maundage to be charged, which shall be presented at the toll office where he will be provided with a ticket, after payment of toll, which will permit the vessel to pass the gate or proceed through the channel.

5. Every ticket shall have entered on it the name of the serang, manjee or other person in charge of the vessel, the date of entry, the maundage, the cargo, the amount of toll charged and the number of days for which the ticket remains current.

6. All tolls are payable on demand and shall be paid at the toll office before a vessel is permitted to proceed.

7. The ticket shall be kept on board the vessel and in possession of the person in charge of the vessel and shall be produced for inspection when demanded by the person authorised to collect tolls, or by any officer to whom such person is subordinate. If on demand the ticket is not produced, such person or officer shall assess the tollage as provided in rules 3 and 12 and shall require payment of toll, and unless and until the toll is paid, or the original ticket or a duplicate is produced as evidence that toll has already been paid, the vessel shall be liable to seizure and detention under the provisions of section 9 of the Act.

8. Duplicates of lost tickets, of which the numbers and dates can be satisfactorily established, will be granted by the collector of tolls on payment of a fee equal to one-quarter of the total tollage, subject to a minimum fee of one anna per ticket.

No. 35/5/39.—The following Reports by the Government Actuary on the valuation of the Indian Civil Service Family Pension Scheme as at 31st March 1937 are published for general information:—

A. G. 14708/38.

## INDIAN CIVIL SERVICE FAMILY PENSION SCHEME.

### REPORT BY THE GOVERNMENT ACTUARY ON THE VALUATION AS AT 31ST MARCH, 1937.

Government Actuary's Department,
20, Great Smith Street.
London, S. W. 1.
*28th November, 1938.*

THE MOST HON. THE MARQUESS OF ZETLAND,
P.C., G.C.S.I., G.C.I.E.,
*Secretary of State for India.*

MY LORD MARQUESS,

1. In compliance with instructions received through the Controller of Pension Funds, I have valued the assets and liabilities of the Indian Civil Service Family Pension Scheme as existing at 31st March, 1937.

2. A short explanation, in general terms, of the process of valuation which it has been customary to give in the quinquennial valuation reports, more especially for the benefit of new subscribers, is embodied in the Appendix.

3. Past experience affords the only reliable guide as to the assumptions which are required for the purpose of a valuation and in the case of a Fund of long standing the experience of the Fund itself is naturally taken for this purpose. Hence, as a first step in the work of valuation as at 31st March, 1937, a comparison was made between the experience of the scheme in the 4 years 1933—37 and the "expectation" resulting from the valuation basis compiled for the valuation at 1928 and used also at the valuation in 1933. The results were necessarily obtained according to age, but their general trend will be sufficiently apparent in the following summary. The figures given relate to Europeans only. The Asiatic subscribers constitute a small class, not recruited by new admissions, which has still further diminished and which, though included in the valuation, is not of importance in the present connection.

*Experience 1933—37 (Europeans: All ages combined).*

| | "Expected" numbers on 1928 valuation *basis.* | Actual *members.* |
|---|---|---|
| Deaths— | | |
| Subscribers (active and retired)— | | |
| Married ... ... ... | 77 | 74 |
| Unmarried ... ... ... | 19 | 22 |
| Wives ... ... ... ... | 31 | 27 |
| Widows (including remarried widows) ... | 12 | 11 |
| Sons ... ... ... ... | 7 | 9 |
| Daughters ... ... ... | 8 | 5 |
| Marriages— | | |
| Subscribers ... ... ... | 82 | 92 |
| Widows ... ... ... ... | 3 | 10 |
| Daughters ... ... ... | 87 | 71 |
| Births— | | |
| Sons ... ... ... ... | 92 | 81 |
| Daughters ... ... ... | 92 | 88 |
| Retirements from Service† ... ... | 196 | 134* |

4. A comparison of this statement with the corresponding statement given in the report of 1933 indicates that, although the experience of the years 1928—33 was very close to the expected, the experience of the later period was in some respects still closer. The present valuation is of special importance in connection with the apportionment of the Fund between those members who have transferred their interests to the Commissioners in Britain and those who elected to continue under the old conditions. A further review was therefore made of the combined experience of the last three valuation periods, which served to confirm the suitability of the present basis. It will be remembered that in the report on the valuation at 31st March, 1933, it was stated that a small margin in the basis had produced a profit in the 5 years of about £100,000. In the later period the corresponding profit emerged at about the same rate. These figures are small in relation to the total liabilities and it is apparent that the margin in the basis is no more than may reasonably and properly be retained in a Fund which is self-supporting and in which the effect of any adverse fluctuation would be borne by the members. Thus the actual financial results amply corroborate the statistical conclusion indicated above.

5. A statement showing the numbers of members (active and retired) and of contingent and incumbent beneficiaries at 1st April, 1933, and of subsequent changes up to 31st March, 1937, is given in Schedule A

*Excluding 20 retirements under the Premature Retirement Rules.
†Membership of the Fund continues.

appended. Separate tabulations were made of the numbers on the latter date who have transferred their interests to the Commissioners in Britain and of those who elected to continue under the old conditions. The numbers in the two groups (including Asiatics) and in the various categories on 31st March, 1937, were as follows:—

| | Transferred. | Untransferred. | Total. |
|---|---|---|---|
| **Subscribers:—** | | | |
| **Active—** | | | |
| Married ... ... | 445 | 131 | 576 |
| Unmarried ... ... | 155 | 26 | 181 |
| **Retired—** | | | |
| Married ... ... | 547 | 76 | 623 |
| Unmarried ... ... | 126 | 6 | 132 |
| **Sons—** | | | |
| Incumbent beneficiaries ... | 29 | 54 | 83 |
| Contingent beneficiaries (father living) ... | 599 | 167 | 766 |
| **Daughters—** | | | |
| Incumbent beneficiaries ... | 134 | 37 | 171 |
| Contingent beneficiaries (father living) ... | 821 | 187 | 1,008 |
| **Widows—** | | | |
| Full pension ... ... | 157 | 91 | 248 |
| Half pension (re-married) ... | 29 | 19 | 48 |

6. The balance of the Fund on 31st March, 1937, as shown by the printed accounts of the year ending on that date, amounted to £4,410,897:9:11. There were however certain sums outstanding, which had not been included, but which, since they related to the period prior to 31st March, 1937, must be taken into account in arriving at the apportionment of the Fund. These sums represented a net credit of £3,281:18:6, of which all but £16:16:1 had been accounted for by 31st March, 1938. The total capital which has to be apportioned between the transferred and untransferred members thus amounts to £4,414,179:8:5.

7. The surplus revealed at the last valutaion would have enabled further progress to be made with the stabilization of a portion of the pensions hitherto payable on a temporary basis. But in view of the impending transfer no alteration was made and the pensions continued at the original rates payable from the Fund with:—

(*a*) a permanent addition of 33⅓ per cent. of the full pensions (inclusive of the portion paid by the Government), and

(*b*) a temporary addition of a further 16⅔ per cent. of the full pensions,

thus making, for the present, a total increase of 50 per cent. on the original pensions. These benefits are modified in the case of those members who, on retirement from the service under the Premature Retirement Rules, elected to take either Option A or Option B.

8. The contributions now payable are at a variety of rates, dependent upon the dates of entry of subscribers. Thus, entrants since 31st March, 1928, are paying contributions 12½ per cent. in excess of the original basic rates, other groups are paying basic rates, 12½ per cent. less than basic rates and 25 per cent. less than basic rates.

9. The rates of pension and contributions indicated above have been taken into account in the calculations, for which purpose it has been assumed that the temporary addition to pensions would be continued up to 31st December, 1939. In accordance with instructions, the rate of 4 per cent. has been adopted as the interest basis for the purpose of ascertaining the position of the Fund, on the assumption that the present arrangements continue.

*Result of the valuation of the Fund as a whole.*

10. The result of the valuation, of which details are given in Schedule B appended, is as follows:—

| | £ |
|---|---|
| Present value of— | |
| Contingent pensions ... ... ... | 2,904,540 |
| Immediate pensions ... ... ... | 1,686,760 |
| Total liabilities ... | 4,591,300 |
| Present value of future contributions and donations ... ... ... ... | 613,066 |
| Net liability ... | 3,978,234 |
| Capital ... ... ... ... | 4,414,179 |
| Surplus ... | 435,945 |

The last valuation revealed a surplus of £325,768 and it was stated in the report on that valuation that this surplus was sufficient to permit of an increase in the permanent pension of 8⅓ per cent. on the original rates. For reasons set out in paragraph 9 of Circular No. A.G.-2249/36 of 22nd April, 1936, it was felt that practical considerations rendered it necessary to postpone the stabilizing of any further portion of the pension. As a consequence, the temporary increase of 16⅔ per cent. was continued, and it has been assumed for present purposes that this increase will continue up to 31st December, 1939; the effect of this has been to absorb £82,000 of the surplus disclosed by the 1933 valuation, leaving £243,768 carried forward. During the 4 years ended on the valuation date, this sum has been increased by £192,177 to £435,945. Approximately 60 per cent. of the increase has been due to interest on the surplus carried forward, interest on the Fund in excess of 4 per cent. up to 31st December, 1934, and late notifications of marriages of daughters in the preceding valuation period, all of which are in the nature of non-recurring profits. The balance represents the result of deviations from the assumed basis which have already been referred to in paragraph 4.

11. Had the fund continued as an undivided entity the additional surplus which has now emerged would have permitted the stabilization of a somewhat larger proportion of the permanent increase in benefits than that recommended after the valuation of 1933, together with the maintenance for a further period of the full increase of 50 per cent. In the absence of any adverse fluctuations it could reasonably have been anticipated that, with the continuance of the small profits from miscellaneous sources, the relatively small increase in pensions which would still have remained on a temporary basis would probably have been stabilized in the not distant future.

*Apportionment of the Fund.*

12. In view of the fact that the Fund has now to be apportioned, it is essential that a strictly appropriate share of the Fund, including the surplus, should be transferred to the Commissioners, and since in the past it has been the practice to allot a common percentage increase in pensions without distinction as to age or class, it would appear that the most suitable manner in which to distribute the surplus is to apply the whole of it by way of a hypothetical uniform increase to the permanent scale of benefits. On this basis the apportionment of the total Fund as at 31st March, 1937, is as follows:—

| | | |
|---|---|---|
| Transferred members | ... | £3,384,410:7:5 |
| Untransferred members | ... | £1,029,769:1:0 |
| Total Fund | ... | £4,414,179:8:5 |

The total amount to be transferred to the Commissioners as at 31st March, 1937, is thus £3,384,410:7:5. It is to be noted that, in arriving at these figures, allowance has been made for all sums which were outstanding on 31st March, 1937, and that the related payments and receipts after that date should be debited or credited as the case may be to the Indian Government.

13. I proposed to submit, in due course, separate reports dealing with the future position of the transferred and untransferred sections.

I am, my LORD MARQUESS,

Your obedient Servant,

G. S. W. EPPS.

## APPENDIX.

### THE PROCESS OF VALUATION.

For the information of those who are not familiar with the process of valuation, the following paragraphs indicate briefly what is the nature of this process, particularly in regard to the undertakings of widows' and orphans' pension schemes.

An actuarial valuation consists of an estimation of the present value, on the one hand, of the benefits conferred by the Fund and, on the other hand, of the contributions payable in future, the difference between the two sums being the "net liability" against which assets accumulated out of past contributions (with interest) should be in hand. The comparison then made between the net liability and the actual assets in hand (represented by the balance at credit of the scheme on the valuation date) determines whether the Fund is solvent, and where the assets are the greater of the two amounts the difference represents the amount of the surplus. In estimating the present value of the future benefits and contributions, it is necessary to have regard to a variety of contingencies, including the mortality rates expected to prevail among the subscribers, their wives (or widows) and their children, the probable marriages and remarriages among subscribers, marriages of daughters and remarriages of widows, the probable number of births of children of each sex to subscribers, retirements of subscribers and the rate of interest at which it is assumed that the accumulating funds can be invested. Apart from the rate of interest, all of these elements vary with the ages through which the persons concerned will pass in the future, and at each stage of the calculations appropriate assumptions must be made as to the conditions prevailing during the long period which must elapse until the death of the last surviving beneficiary under engagements entered into with present or former subscribers. These engagements may extend over very many years; to take a simple example, an officer entering at the age of 24 (which is about the average age at entry) may not marry until he is 40 and may leave at his death a spinster daughter born when he was 44 and who lives unmarried and therefore a pensioner to the age of 80. As she was not born until 20 years after her father joined the Service the contract, beginning first with contributions from the member and later taking the form of a pension to the daughter, will have extended over 100 years.

The valuation does not take account of the engagements in respect of officers entering the Service after the date as at which the valuation is made.

THE MOST HON. THE MARQUESS OF ZETLAND,
P.C., G.C.S.I., G.C.I.E.,
*Secretary of State for India.*

*Indian Civil Service Family Pension Scheme Untransferred Section.*

MY LORD MARQUESS,

1. In my report on the valuation as at 31st March 1937, of the Indian Civil Service Family Pension Scheme, I showed that the amount of the fund applicable to those subscribers and beneficiaries who elected to continue under existing conditions was £1,029,769-1-0.

2. The valuation, at 4 per cent. interest, of the assets and liabilities in respect of these members, and the position of the untransferred fund, is shown in the following statement corresponding to that given in paragraph 10 of my report on the valuation of the whole fund.

| | £ |
|---|---|
| Present value of— | |
| Contingent pensions ... ... ... | 482,752 |
| Immediate pensions ... ... ... | 573,684 |
| Total liabilities ... | 1,056,436 |
| Present value of future contributions and donations ... ... ... ... | 121,657 |
| Net liability ... | 934,779 |
| Capital ... ... ... ... | 1,029,769 |
| Surplus ... | 94,990 |

3. The allocation of this surplus on the lines adopted in previous valuations of the whole fund gives the following results:—

| | £ |
|---|---|
| A. Increase of stabilized addition to the pensions from 33⅓ per cent. to 43⅓ per cent. ... ... | 74,010 |
| B. Provision of a further 6⅔ per cent. for the 5 years ending 31st December 1944 ... ... | 11,490 |
| Total . | 85,500 |

The balance of surplus to be carried forward amounts to £9,490.

4. While therefore the present position is broadly the same as that indicated in paragraph 11 of my report on the valuation of the whole fund, it would appear that the substantially reduced membership consequent upon the transfer, which moreover will not be recruited by new entrants, has introduced greater scope for fluctuations in experience. The point is of importance in connection with the prospective maintenance of the full increase of 50 per cent. in benefits and it must be recognized that a greater degree of caution will have to be exercised when extending the permanent commitments of the Fund.

5. The future is somewhat less secure, but the numbers remaining in the untransferred section and the related resources are sufficient to enable the Fund to continue on a self-supporting basis, for some time at any rate, and there is no present necessity for the Government to take over the Fund and guarantee the benefits on the lines suggested in the circular letter, dated 15th March, 1935. Since, however, there will be no new entrants, the membership will diminish, and it is evident that the stage will be reached, possibly within the next 15 years, when the Fund will no longer be able to maintain an independent existence on a stable basis.

I am, my LORD MARQUESS,

Your obedient Servant,

G. S. W. EPPS,

POLICE.

## STATEMENT OF OBJECTS AND REASONS.

Detailed scrutiny of the Insurance Act, 1938, has revealed a considerable number of defects of a technical kind which should be removed before the Act is brought into force. It is also desirable to make it clear that insurers who set up organisations outside British India and operate through agents in British India are within the scope of the Act. Further, in view of projected legislation in certain Indian States on lines similar to the Insurance Act, 1938, certain disabilities would be imposed on insurers registered under the Act which would seriously impede the development of their business outside British India. The amending Bill is designed to give relief in such cases without impairing the security for policy-holders in British India. Notes on clauses are appended.

*The 31st January, 1939.* N. N SIRCAR.

### NOTES ON CLAUSES

*Clause 2.*—(*a*) widens the scope of the definition of "insurer" to bring in insurers who operate from a principal place of business outside British India and who, while it is doubtful if under the existing definition they can be said to be carrying on insurance business in British India, obtain British Indian insurance business by the employment of representatives or by establishing a place of business in British India.

(*b*) extends the definition to include triple indemnity accident benefits for which some companies provide.

*Clause 3.*—(*a*) Section 7(*1*) (*j*) of the principal Act was intended to provide for a smaller deposit payable by small concerns carrying on marine insurance in a limited field: as the provision is at present worded, it is capable of the interpretation that it adds to rather than reduces the deposit referred to in section 7 (*1*) (*c*). This amendment will remove that ambiguity.

(*b*) The expression used elsewhere in section 7 is "*carried on* in British India", and this amendment is made as uniformity is desirable.

(*c*) When it was found impossible to bring the principal Act into force by the 1st October last, it was realised that section 7 (*3*) might give rise to a situation in which the second instalment of deposit became payable before the first. This amendment removes that anomaly.

(*d*) Section 7 (*4*) is intended to refer to the same category of insurers as section 7 (*3*), namely, those incorporated or carrying on business before the 27th January 1937, and to qualify, in the case of certain insurers within that category, the concession given by section 7 (*3*). The present wording of section 7 (*4*) does not effectively carry out this intention and is accordingly clarified by the amendment proposed.

*Clauses 4 and 5.*—These clauses insert references to a section inserted in the principal Act during its passage through the Legislature. These amendments and others of similar character appearing later in this Bill are necessary consequences of that insertion.

*Clause 6.*—Marine insurance is a specialised form of insurance business and there have been found to exist difficulties, both legal and practical, in applying section 46 to such class of insurance business. Moreover it would seem that the reasons which call for amendment to section 46 also operate to render the records required under section 14 of little practical value, and the exclusion of marine insurance business from that section also is consequently proposed.

*Clause 7.*—(*a*) provides for *certified* copies of the second set of statements referred to in section 16 (*2*) as well as of the first such set.

(*b*) *and* (*c*).—As section 12 does not apply to cases coming under section 16 (*2*), it is necessary to insert in this sub-section a provision requiring audit.

*Clause 8.*—(*a*) The use of the expression "a company incorporated under the Indian Companies Act, 1913" in section 17 and in other places in the principal Act excludes from the scope of those provisions companies incorporated under the earlier Companies Acts of 1866 and 1862. The wording now proposed, already in use in section 11 (*2*) of the principal Act, will remove this defect.

(*b*) The wording is revised to follow more closely that of the Indian Companies Act, 1913, to which it is related.

*Clause 9.*—The principal Act repeals the earlier insurance law, but it is thought necessary to make it clear that the earlier law will continue to apply even after the coming into force of the principal Act to the disposal of accounts for periods which ended before the principal Act comes into operation.

*Clause 10.*—(*a*) (*i*) *Vide* note on clauses 4 and 5.

(*a*) (*ii*) Section 27, as it stands, might be read as permitting the deduction of policy loans which do not relate to policies maturing in India, or which are in excess of the surrender values of the policies: this amendment makes such an interpretation impossible.

(*a*) (*iii*) and (*b*). Where the law of an Indian State requires a cover in respect of life insurance policies maturing for payment in that State (perhaps on a scale equal or greater than that provided in the principal Act, it would be a manifest hardship to require the insurer to make such overlapping cover. The first of these amendments provides relief for insurers registered in British India by arranging that the cover to be made in British India will take into account the cover made elsewhere, but in such a way that the total cover is never less than that required by the principal Act standing alone. The second amendment is consequential upon the first in the sense that it provides that in cases where advantage is taken of this new provision, the liability of the trust in respect of the policies concerned shall be proportionately reduced.

*Clause 11.*—Section 28, as it stands, is considered to give insufficient time for the submission of the required statements: this is accentuated in cases of companies whose principal place of business is overseas. The amendments proposed will ease the difficulties in this respect without detracting from the purposes of the section.

*Clause 12.*—(*a*) *Vide* note on clauses 4 and 5.

(*b*) It has come to the notice of Government that some insurance companies keep the bulk of their assets in the name of the Official Trustee, as an additional protection to their policy-holders. The practice is inconsistent with section 31 as it now stands and the proposed amendment is designed to remove the bar to such an arrangement.

*Clause 13.*—*Vide* note on clauses 4 and 5. Here the insertion of the omitted reference entails slight rearrangement of the wording

*Clause 14.*—(*a*) The first part of the sub-clause removes the anomaly inherent in requiring notice of a transaction to which he is himself a party to be served on the insurer. The second amendment in the sub-clause is to provide that the insurer (who is to be bound by the transfer or assignment) shall see either the instrument of the transaction or a true copy of it. The third amendment takes into account the new class of insurer introduced by clause 2 of this Bill, and removes redundant words.

(*b*) Sub-sections (*5*) and (*7*) of section 38 are inconsistent in the sense that the latter permits conditional assignments while the former makes no provision for them. The former sub-section is hereby amended to bring it into line with the latter.

(*c*) removes ambiguity in phrasing, the existing form leaving it doubtful whether "existing prior to the commencement of this Act" qualifies "rights and remedies".

(*d*) also removes an ambiguity, this time latent in the definition of "policy-holder".

*Clause 15.*—(*a*) This amendment is also occasioned by the definition of "policy-holder" and makes it clear that an absolute assignee does not possess the right to nominate.

(*b*) includes a necessary provision to indemnify the insurer without notice of a revoked nomination where he makes *bona fide* payments to a nominee in the policy or registered in his books.

(*c*) adjusts a small drafting defect, the case of revision of nomination by will not being covered by the existing wording.

*Clause 16.*—(*a*) and (*b*) remove matter which in view of the definition of "insurance agent" is superfluous.

(*c*) The application of the definition of "insurance agent" to section 40 (*3*) as it stands at present causes a conflict with the intention of the sub-section which the proposed amendment removes.

*Clause 17.*—*Vide* note on clause 6.

*Clause 18.*—There must be circumstances in which the insurer is not in a position to be immediately aware of the maturing of a policy of life insurance: in those circumstances the time provisions in section 47 should run from the receipt of notice of such maturing by the insurer.

*Clause 19.*—(*a*) *Vide* note on clause 8 (*a*).

(*b*) Section 48 as it stands fails to make provision for companies taking up life insurance business after the commencement of the principal Act: in such cases it is necessary that time should be given to allow the directorate to obtain the necessary qualifications in the matter of policy-holding.

*Clause 20.*—The expression "lapsing of a policy" is considered to be too vague and capable of varying interpretation. The section is accordingly revised in the interests of clarity.

*Clauses 21 and 22.*—*Vide* note on clauses 4 and 5.

*Clause 23*—removes a minor defect.

*Clause 24*—corrects a misprint.

*Clauses 25 and 26*—are intended to avoid difficulties in applying the principal Act, by making it clear that "year" shall be taken to be the calendar year. Clause 30 has the same end in view.

*Clause 27.*—*Vide* note on clause 8 (*a*).

*Clause 28.*—*Vide* note on clause 12 (*b*).

*Clause 29.*—*Vide* note on clause 8 (*a*).

*Clause 30.*—*Vide* note on clauses 25 and 26.

*Clause 31*—adjusts a drafting flaw.

*Clause 32*—supplies an omission.

*Clause 33.*—(*a*) corrects a misprint.

(*b*) The insertion is proposed to meet a difficulty which may result from similar legislation in Indian States.

*Clause 34.*—Provision was overlooked for the commencement of the period of limitation for a suit in respect of a sum payable on a loss, though Article 86 of the Indian Limitation Act, 1908, refers to such suits.

*Clause 35*—effects a more accurate form of expression.

*Clauses 36 and 37*—remove minor errors and inconsistencies and supply minor deficiencies in the Forms contained in the Schedules.

## STATEMENT OF OBJECTS AND REASONS.

The Government of India have had under consideration for some time past the question *inter alia* of devising measures for the protection of miners against the dangers involved in the present methods of extraction in the main coalfields where a stage has been reached at which the continued extraction of the large quantities of coal standing in pillars by ordinary methods is impossible in some cases and would, in other cases, involve serious danger to those engaged in the work and the likelihood of a great wastage of coal. They accordingly appointed a committee known as the Coal Mining Committee in October, 1936, to inquire into the methods of extracting coal underground in Bengal, Bihar and the Central Provinces and to report on the measures which should be taken to secure the safety of the workers and to prevent avoidable waste of coal. The Committee have advocated the adoption of stowing, i.e., the filling with sand or other incombustible material of the space left by the extraction of coal, to start with, in areas where there is urgent and immediate danger to life or urgent danger of substantial loss of coal. The Committee have recommended that a cess of 8 annas per ton on coal, including soft coke, and 12 annas per ton on hard coke should be imposed, to be used mainly to defray the cost of stowing. The recommendations of the Committee have been examined by the Government of India in consultation with the Provincial Governments and the interests concerned. The Government of India feel that for the present at any rate the main objective of any proposals should be to secure the safety of the worker. Such proposals would incidentally result in a certain amount of conservation but safety should be the primary objective. The Bill is designed to give effect to these proposals. Notes on some of the clauses are appended.

*The 4th February, 1939.* ZAFRULLAH KHAN.

NOTES ON CLAUSES.

*Clause 3.*—modifies in certain respects the constitution proposed by the Committee in paragraphs 278-283 of their report for the administrative authority recommended by them. The Committee's proposal is open to the objection that the constitution of the authority would be largely in the hands of the Chairman and that its personnel would be constantly changing.

*Clause 4.*—is designed to give powers to the Committee to co-opt technical experts for dealing with any technical questions of importance that may arise.

*Clause 5.*—The maximum rate of the excise duty proposed in the clause is considered adequate for the requirements of the scheme proposed in the Bill.

*Clause 6.*—follows section 6 of the Sugar (Excise Duty) Act, 1934, and is designed to implement the recommendation made by the Committee in paragraph 381 of their report.

*Clause 10.*—follows the recommendation of the Committee in paragraph 268 of their report. A Central tax on royalties is not constitutionally permissible. As this proposal is not free from complications, it is proposed to leave it to the Board to permit the deduction from royalties or not.

*Clause 11.*—*Sub-clauses (1)* and *(2)* need no comment. *Sub-clause (3)* is designed to enlarge the powers conferred on the Mines Inspectorate by sub-section *(1A)* of section 19 of the Indian Mines Act, 1923, and to implement in modified form the recommendation made by the Committee in paragraph 290 of their report.

*Clauses 12 and 13.*—Clause 12 is designed to extend the procedure prescribed in the Mines Act for appeals against orders passed under section 19*(2)* of that Act to orders passed under clause 11*(3)* of the Bill; the constitution of the appellate tribunal is proposed to be strengthened as in clause 13 in view of the importance of the issues involved.

| 1 Head Gardener. | 1 Night Watchman. |
| 14 Gardeners. | 2 Chaprasis. |
| 3 Sweepers. | 1 Syce. |

1 Scytheman.

In addition temporary men were engaged as required.

His Excellency the most Hon'ble the Marquess of Linlithgow, Viceroy and Governor-General of India kindly visited the Gardens on the 28th December 1937 and evinced great interest in a number of the exhibits.

Various births amongst mammals and birds have been recorded during the year: the most important being one male Grant's zebra and two hippopotami. Three chimpanzees, one from London and two from the Edinburgh Zoo were acquired. Mr. R. N. De, I.F.S., Dhubri, kindly presented a pair of tiger cubs and the President, Zoological Society of San Diego, California, sent two Elephantine Tortoises.

The general condition of the animals was satisfactory including the large carnivora. Casualties throughout the year have been normal while the collection has been added to and improved from time to time by gifts, exchange and purchase. Many interesting births have been recorded in the Garden during the year and a large proportion of the young were reared and are thriving well.

**Gardens.**—The ornamental parts of the Garden such as lawns and flower beds have been improved and maintained at their usual high standard. The Garden was awarded several prizes at the Annual Flower Show of the Agri-Horticultural Society of India. Particular mention being made of their exihibit of flowering annuals.

An innovation, which was appreciated by the public, was the marking of every tree, creeper and shrub in the Gardens with its botanical and popular names.

No important constructional works were undertaken during the year under report. Repairs and alterations to existing buildings and enclosures were effected as follows:—

1. *Repairs* were made to the main circular road from the main gate to the Reptile house along the east and west boundary lines by spreading and consolidating "Jhama" metal with steam-rollers.

2. *Boundary wall.*—A portion of the compound wall opposite the Zeerut bridge had collapsed during the rains and was immediately reconstructed. Sundry petty repairs were effected and the eastern boundary wall of the Garden was colour-washed.

3. *Sarnomoyi House.*—Repairs to this building had become urgent and a 5″ sand and cement wall was constructed round the west, south and eastern sides.

4. *Chimpanzee Enclosure.*—It was found necessary to protect the animals in this enclosure from the indiscriminating attentions of the public, and a fence of interlinked wire-netting more than ten feet high and of 14 gauge English wire, has been erected round the island. Necessary petty repairs were taken in hand to strengthen the retaining wall of the island.

5. *"Hermitage".*—General repairs were effected in the main building including exterior and interior decorations. The outhouses were repaired and the whole building was rewired.

6. *Sonebursa Enclosure.*—The existing inner enclosure was subdivided and thoroughly repaired so as to provide double the number of lock up cages

7. *Pheasant House.*—With a view to render cage No. 21 in this house, proof against rats, a concrete floor was laid. The result, however, has not proved satisfactory.

8. *Pigmy Hippos.*—On the shores of the big lake and on the site of the Old Rhino Enclosure, a new enclosure was constructed of cement and brick walls topped by inter-link wire-netting. A partition was made down the centre to allow the pair to be separated.

9. *Schwendler House.*—A dwarf cement wall was constructed round the base.

10. *Gubbay House.*—The south-east corner cage in which the male Mandrill is exhibited was thoroughly repaired with cement concrete and sand-cement plaster.

11. *Hospital.*—A large thatched shed was erected to accommodate various newly-purchased pheasants during the hot weather.

12. Four new concrete dust bins were constructed to help the garden staff in the speedy clearance of all litter.

13. A wall surmounted with inter-link wire-netting was constructed to fill in the arch of the bridge spanning the large and ornamental lakes. It is hoped that as a result it will be possible to control the water levels of each lake and to prevent birds in the larger lake from straying elsewhere.

**Financial position.**—The financial condition of the Garden is satisfactory largely owing to the rigid economy which has been observed during the past few years. There was a welcome increase in the receipts from visitors, which amounted to Rs. 58,664-9 in the year under review as against Rs. 55,622-12 in the previous year. From the detailed statement of receipts and expenditure which will be found in Appendix A, it will be seen that the increase in entrance receipts amounting to Rs. 3,041-13 accounts for nearly 50 per cent. of the total increase in revenue of Rs. 6,653-4-8 over the previous year.

**Visitors.**—The following is comparative statement of visitors and receipts for the last four years:—

| Years. | Visitors. | Receipts. Rs. a. |
|---|---|---|
| 1934-35 .. | 1,011,616 | 65,055 0 |
| 1935-36 .. | 919,172 | 57,477 11 |
| 1936-37 .. | 889,099 | 55,622 12 |
| 1937-38 .. | 936,744 | 58,664 9 |

**The Corporation of Calcutta.**—Sanctioned a grant of Rs. 26,233-6 to the Garden for the year under report a sum equal to the amount of the rates payable to the Corporation for the same period.

The Committee desire to express their thanks to the Corporation of Calcutta for their generous contribution. In the report for the previous year reference was made to a sum of Rs. 4,328-8 as being the unadjusted balance on account of rates and taxes for the year 1934-35, the Committee are glad to state that this sum has since been restored by the Corporation and they take this opportunity of expressing their thanks to those responsible for this result.

A number of children under four years of age and many school children attended by their teachers were admitted to the Garden free. In addition 55,591 persons visited the garden on free days.

A detailed statement of the number of visitors and receipts appears in Appendix B.

The Committee wish to convey their appreciation and thanks to those members of the public as well as to members of the Garden who have contributed towards the satisfactory results achieved during the year under review.

A list of those ladies and gentlemen who have made gifts to the collection generally will be found in Appendix C. There are many offers of present of animals to the Garden, but these offers could not always be accepted either because the particular species was already sufficiently well represented, or owing to lack of accommodation.

The Committee also desire to express their thanks to the following Railway and Steamer Companies for kindly conveying animals belonging to the Garden free of charge:—

(1) British India Steam Navigation Company.
(2) East Indian Railway.
(3) Rivers Steam Navigation Company, Limited.

Once more Mr. W. K. Dods, the Vice-President of the Garden has been instrumental in procuring and presenting to the Garden a variety of birds and beasts. He has also been a generous donor of flower seeds and bulbs, and he has been responsible for providing large quantities of fresh ant's eggs which contribute materially to the well-being of the birds. The Committee record with thanks his gifts and services.

Thanks are due to the Commanding Officer of the 1/15th Punjab Regiment, stationed at Alipore, for permitting their regimental band to play at the Garden on Tuesday and Sunday afternoons and the Committee again record their indebtedness to those members of the public who sent old or broken horses to the Zoological Gardens, where they were destroyed under the most humane conditions.

G. D. McNAIR,
*President.*

H. A. FOOKS,
*Honorary Secretary.*

## DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 25th February 1939.

### Second Forecast of the Wheat Crop of Bengal, 1938-39.

(*Note.*—On an average of the five years ending 1936-37, the area under wheat in Bengal has represented some 0·4 per cent. of the total area under wheat in India. The ratio of the irrigated wheat acreage to total wheat acreage in (*a*) British India and (*b*) in the territory now reported on has, in the five years ending 1936-37, averaged (*a*) 42·0 and (*b*) 9·2 per cent., respectively.)

*Character of the season.*—As indicated in the first forecast the weather conditions were generally helpful for field operations and commencement of sowing of the crop in normal time. Subsequently, however, drought set in and affected the growth of the crop. Insect-pests have also done some damage at places. On the whole, a fair crop is expected for the province.

*Acreage.*—According to the estimates of the District Officers the total area sown is 174,000 acres this year as against 160,900 acres both in the corresponding and final forecasts of last year.

*Outturn.*—The average provincial outturn as worked out from the district estimates is 76 per cent. as against 83 and 80 per cents., respectively, in the corresponding and final forecasts of last year.

M. CARBERY,

*Director of Agriculture, Bengal.*

## APPENDIX.

### Second Forecast of the Wheat Crop of Bengal, 1938-39.

| District. | Estimated normal area under wheat crop. | Estimated area under wheat. | | Estimated outturn as a percentage of the normal yield per unit of area. | | Date on which the sowing of the crop was begun this year and whether that date was early, normal or late. | Remarks by District Officers. |
|---|---|---|---|---|---|---|---|
| | | Last year | This year. | Last year. | This year. | | |
| | Acres. | Acres. | Acres. | | | | |
| Nadia .. | 29,000* | 20,300 | 29,000 | 67 | 67 | October to November. | The increase in area is due to favourable weather at the sowing time and utilization of failed areas during last flood. Some damage done to the crop by drought. |
| Murshidabad .. | 47,100 | 43,700 | 49,300 | 95 | 80 | November. Normal | The increase in area is due to the failure of *bhadoi* crops by high flood. Some damage has been done to the crop by drought and hence the outturn is anticipated to fall below the normal. |
| Jessore .. | 700 | 800 | 900 | 67 | 75 | Ditto .. | The increase of area, as compared with the estimate of first forecast, is due to the fact that the lands washed away by flood have been put to this and other crops. Some damage done to the crop by insect-pest. Hence the outturn is expected to fall below the normal. |
| Burdwan .. | 1,500 | 1,400 | 1,500 | 92 | 92 | Ditto .. | The weather has been seasonable. |
| Birbhum .. | 4,700 | 4,000 | 4,000 | 92 | 92 | Ditto .. | Ditto. |
| Bankura .. | 6,500 | 5,400 | 5,300 | 92 | 83 | Ditto .. | The weather has been fairly favourable except in Vishnupur Circle. Some damage has been done to the crop by drought. Hence the outturn to fall below the normal. |
| Midnapore .. | 800 | 600 | 600 | 67 | 67 | October and November. Normal. | The weather has been fair. Damage has been done to the extent of about 6 annas in Jhargram subdivision on account of drought. |
| Hooghly .. | 200 | 200 | 200 | 75 | 67 | First week of November. Normal. | The weather has been fair. About 4 annas damage is expected for want of water for irrigation. |
| Rajshahi .. | 7,800 | 10,500 | 11,800 | 83 | 75 | November. Normal | The weather has not been favourable owing to want of rain. Damage to the extent of 3 annas has been done to the crop by drought. |
| Dinajpur .. | 1,300 | 2,500 | 2,500 | 83 | 83 | Ditto .. | The weather has been fairly favourable. |
| Jalpaiguri .. | 800 | 700 | 600 | 92 | 87 | Middle of November | Decrease in area is due to revision of estimate. The weather has been fairly favourable. |
| Darjeeling .. | 2,900 | 3,400 | 3,400 | 100 | 100 | November. Normal | The weather has been favourable. |
| Rangpur .. | 3,700 | 3,900 | 3,900 | 95 | 85 | Ditto .. | The weather has been unfavourable and the condition of the crop is unfair for want of rain. |

| Pabna .. | 8,000* | 7,000 | 8,000 | 83 | 83 | Beginning of November. Normal. | The increase in area is due to the fact that the cultivators utilized more lands for wheat and other crops after their paddy was severely damaged by flood. The growth of the crop has been retarded for want of rain. Hence the outturn is expected to fall below the normal. |
| Malda .. | 43,000 | 45,600 | 41,600 | 75 | 67 | November. Normal | The weather has not been favourable owing to want of rain. Damage to the extent of 2 annas due to want of rain. |

| Faridpur .. | 2,800 | 2,900 | 3,000 | 87 | 75 | Last week of November. Normal. | Continuous drought after the sowing is likely to cause the outturn to fall below the normal. |

No. 2-I.—4th February 1939.—The following draft of rules, which, in exercise of the power conferred by section 11 of the Canals Act, 1864 (Bengal Act V of 1864), the Governor proposes to make for the lines of navigation known as the Gabkhan-Bharani Khal (formerly known as Jhalakati Bharni Khal and Srijug Khal up to and through the new cut near Jhalakati) are hereby published for the information of persons likely to be affected thereby.

11. Any objection or suggestion with respect to the draft rules should reach the undersigned not later than the 31st March 1939:—

**Draft rules.**

*Class I.*

A. The product of one quarter of the length of the vessel from stem to stern, measured along the water-line, multiplied by the interior greatest breadth of the vessel, multiplied by the depth from the water-line to the interior bottom of the vessel, is to be taken as equal to the number of maunds upon which tolls shall be levied.

B. The measurement of the length is to be made in feet, rejecting inches; the measurement of breadth and depth is to be made in feet and quarters of a foot, rejecting any remainder of less than a quarter of a foot.

C. The maundage on which the amount of toll is calculated shall be reckoned to the nearest integral multiple of 12½ maunds, any remainder of less than 12½ maunds being rejected. In the case of vessels exceeding 500 maunds by measurement, the maundage shall be reckoned to the nearest integral multiple of 50 maunds, rejecting any remainder of less than 50 maunds.

D. *Saltees.*—The product of one quarter of the inside length of the vessel, measured along the centre line from stem to stern, multiplied by the interior greatest breadth of the vessel, multiplied by the greatest depth measured from the top to the interior bottom of the vessel, is to be taken as equal to the number of maunds upon which tolls shall be levied.

*Class II.*

For vessels of class II the number of maunds obtained by the system of measurement prescribed for vessels of class I shall be increased by one-half. For vessels of this class above 5,000 maunds measurement, the maundage shall be reckoned to the nearest integral multiple of 500 maunds, rejecting any remainder of less than 500 maunds. In the case of steamers and motor boats the maundage determined as above shall be reduced by one-third as an allowance of engine space.

For vessels of class II which are furnished with reliable way bills, the gross maundage of cargo shown by the way bills or in the case of steamers, the maundage obtained from multiplying the registered tonnage of the steamer by 27, may, at the option of the employer of the vessel or the steamer (as the case may be) be taken as the maundage on which tolls will be charged.

4. After the measurement the person in charge of the vessel shall be provided with a slip showing the maundage to be charged, which shall be presented at the toll office where he will be provided with a ticket, after payment of toll, which will permit the vessel to pass the gate or proceed through the channel.

5. Every ticket shall have entered on it the name of the serang, manjee or other person in charge of the vessel, the date of entry, the maundage, the cargo, the amount of toll charged and the number of days for which the ticket remains current.

6. All tolls are payable on demand and shall be paid at the toll office before a vessel is permitted to proceed.

7. The ticket shall be kept on board the vessel and in possession of the person in charge of the vessel and shall be produced for inspection when demanded by the person authorised to collect tolls, or by any officer to whom such person is subordinate. If on demand the ticket is not produced, such person or officer shall assess the tollage as provided in rules 3 and 12 and shall require payment of toll, and unless and until the toll is paid, or the original ticket or a duplicate is produced as evidence that toll has already been paid, the vessel shall be liable to seizure and detention under the provisions of section 9 of the Act.

8. Duplicates of lost tickets, of which the numbers and dates can be satisfactorily established, will be granted by the collector of tolls on payment of a fee equal to one-quarter of the total tollage, subject to a minimum fee of one anna per ticket.

9. All vessels, whether the property of Crown, of District Board, or other local bodies or of private persons, are liable for toll except those specially exempted under these rules or by a resolution passed by the district board of Bakarganj from time to time.

10. The canal may be closed once a year for effecting the necessary repairs to it on seven days' notice of the intention so to close it being given; but in the event of any sudden emergency the canal may be closed at any time without prior notice, and no claim in such case by owners of vessels or others for compensation on account of detention shall be entertained.

11. No rafts exceeding 50 feet in length and 5 feet in breadth shall be permitted to enter the canals.

12. The rate of toll shall be as follows:—

(*1*) On all vessels empty or laden per hundred maunds'—Twelve annas.

(*3*) On rafts of bamboos, grass, timber or other similar articles, not exceeding 50 feet in length and 5 feet in breadth—Six annas each raft.

Tolls shall be levied at Barisal or at Amanotganj near Barisal Chowk Bazar, at Kawnia near old cremation ground (at the west end of Jail khal), at Defulia near Baniakati bridge and at North Karapur (Bagadhi) at the west end.

13. For boats frequently using the canal, such as boats carrying passengers, grass or perishable articles monthly tickets will be issued at 10 times the ordinary toll.

14. Every vessel which has paid toll shall be allowed to remain in the canal for three days inclusive of the days of entry into and leaving the canal. A vessel remaining in any part of the canal longer than three days shall be charged demurrage equal to one half of the toll for each day in excess of three days. No vessel shall be permitted to remain in the canal for more than one month, i.e., provided that this rule shall not apply to vessels holding monthly tickets under rule 13, which may remain in the canal for more than three days without payment of demurrage but not for more than one month at a time.

15. No vessel carrying exclusively police officers or servants, soldiers and officers of the British Army, post mail runners, officers of the Irrigation Department on duty, officers and servants of the toll office for the canal referred to in these rules while on duty, shall be liable for toll in the canal.
